## ADD A THIRD DIMENSION TO EVIDENCE PHOTOGRAPHY

Evidence photography is important in police work, both as an aid in solving crimes and in presenting evidence to the jury. The more descriptive the photograph, the more valuable it becomes to the investigating officers. It serves to refresh their memories and often may reveal additional evidence that previously was overlooked.

The three dimensional Stereo Graphic performs this function more perfectly than any other camera. That's because it adds the dimension of depth to police photography. The officers and jurors can view the scene exactly as it appeared when the investigators arrived. Distances between objects can be easily visualized while the whole scene springs to life in natural color for easy identification of evidence.

There are no focusing problems with the Stereo Graphic because every picture is automatically in focus from foreground to background. It is the easiest stereo camera in the world to operate. There is only one dial to set.

With the Stereo Graphic the shutter is automatically cocked as the film is advanced. Double exposures are automatically prevented. Also provided are a film counter dial and built-in flash synchronization. Its lightweight, precision die-cast aluminum body gives the camera ruggedness that assures years of trouble-free service.

For additional information, call the local Graflex dealer listed in the yellow pages of your phone book or write Dept. LO-127, Graflex, Inc., Rochester 3, N.Y.

## IS THE SAFEST

## We wish you a SAFE Merry Christmas and Happy New Year...

To insure your safety we have developed a new type helmet which scientifically insulates *all* vital portions of the head from *both* deadly impact shocks and penetration from outside objects.

Life saving tests data medically prove the only true test of a helmet is measurement of its ability to absorb and keep impact shocks from the wearer's skull. Remember —damaged brain cells do not regenerate!!!
